DETAILED FINAL ACTION

Response to Arguments

1. Applicant's arguments made in light of the amendment, filed 05/30/2006, with respect to the prior art rejection of claims 1,2,8-12,18-22 and 28-30 have been fully considered and are persuasive. The 35 U.S.C. §102(e) rejection of claims 1,2,8-12,18-22 and 28-30 has been withdrawn.
2. Applicant has failed to remark or rectify the 35 U.S.C. §101 rejection still outstanding. The rejection is maintained.
3. Applicant has failed to remark or rectify the objection to the title. The objection is maintained.

Specification

4. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

The following title is suggested: "Method, system and article of manufacture for processing packets utilizing descriptor logic".

Claim Rejections - 35 USC § 101

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 21-30 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.
6. Claims 21-30 are rejected under 35 U.S.C. 101 because the claims are not limited to tangible embodiments. In view of Applicant's disclosure, specification

Art Unit: 2182

paragraph 24, the article of manufacture is not limited to tangible embodiments, instead being defined as including both tangible embodiments (e.g., hardware components in which the code is embodied, processed and executed; paragraph 24, "...EEPROMS, ROMS,PROMS,RAMs,DRAMs,SRAMS...) and intangible embodiments (e.g., signals propagating through space, radio waves, infrared signals, and software components in which code is embodied, paragraph 24). As such, the claim is not limited to statutory subject matter and is therefore non-statutory. To overcome this rejection the claims need to be amended to include only the physical computer media and not a transmission media or other intangible or non-functional media.

Allowable Subject Matter

7. Claims 1-20 are allowed.

The following is the statement of reasons for the indication of allowable subject matter: The prior art disclosed by the applicant and cited by the Examiner fail to teach or suggest, alone or in combination, ***all*** the limitations of the independent claim(s) (claims 1 and 11), particularly a method and system for processing packets from an I/O device such that information is maintained indicating a different pair of a first buffer and a second buffer assigned to each of a plurality of descriptors, wherein one of the first and second buffers assigned to one descriptor is used by the I/O device and wherein the I/O device write packets to the buffers assigned to the descriptors.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
